

SPARSH SAXENA

Software Developer | Full Stack Developer

☎ +91-7668369615 ✉ saxenayash0011@gmail.com 🌐 [linkedin.com/in/sparsh-saxena01/](https://www.linkedin.com/in/sparsh-saxena01/)

Summary

Aspiring Software Engineer with experience in end-to-end product development, web development, and system architecture. Skilled in building scalable, AI-driven products and automation platforms with a product thinking and execution-focused mindset. Strong ability to work independently, coordinate with stakeholders, and take ownership from deployment to production support and optimization. Experienced in system integrations, problem-solving, and decision-making with a startup mindset and interest in SaaS. Ready to contribute to leadership, team management, mentoring, and hiring as part of engineering growth.

Skills

Languages: Java, JavaScript (ES6+), TypeScript, Python, SQL, HTML5, CSS3

Frontend & Backend: React.js, Next.js, Redux, Tailwind CSS, Spring Boot, Node.js, Express.js, Microservices

Databases & Tools: PostgreSQL, MySQL, MongoDB, Docker, Git, GitHub, CI/CD, Postman, Vercel

Core & AI: DSA (400+ Qs), System Design, Distributed Systems, Gen AI, LLMs, Prompt Engineering, RAG

Projects

Hateable – Design Applications | *Java, SpringBoot*

- **Built Scalable microservices architecture** with end-to-end product development and system integrations.
- Implemented event-driven architecture with Kafka for async communication.
- Used Redis for caching & rate limiting – improved performance and optimization.
- Integrated LLM-based AI code generation – an AI-driven product for automation platforms.
- Managed production support and deployment using Docker, ensuring scalability and fault tolerance.

Currix – Resume Builder | *React, MongoDB, SpringBoot*

- Built an AI-powered resume analysis platform with SaaS-like functionality.
- Developed secure backend with JWT auth – strong product engineering.
- Implemented ATS scoring, plagiarism detection, and AI-based suggestions using OpenAI API.
- Managed system integrations with Cloudinary for file/image storage.
- Built responsive frontend using React and Vite for fast web development and optimization.

Kozen – Chatbot | *Node.js, MongoDB, Express*

- Built AI chatbot with Gemini API – demonstrating startup mindset and ability to work independently.
- Developed secure backend with JWT auth – strong product engineering.
- Implemented authentication and session management – strong product thinking and problem-solving.
- Designed responsive UI with theme support.
- Used MongoDB for data storage.

Awards & Certifications

- **Java Developer (SpringBoot + AI) – 2026:**
- **Generative AI with LLM – Coursera 2025:**
- **Prompt Engineering – Google 2025:**

Education

B.Tech Computer Science and Engineering

2023-27

JSS Academy of Technical Education, Noida
