

SPARSH SAXENA

Software Developer | Mern Stack Developer

Noida 201301 | +91 7668369615 | saxenayash0011@gmail.com | **GitHub:** github.com/YashSaxena070/ | **LinkedIn:** linkedin.com/in/sparsh-saxena01/

ABOUT ME:

Aspiring Software Engineer with strong foundation in Java, Spring Boot, JavaScript, and Node.js, skilled in developing scalable microservices, REST APIs, and full-stack applications. Seeking to leverage knowledge of system design, distributed systems, Kafka, Redis, and cloud technologies to contribute to high-performance software solutions

EDUCATION:

JSS Academy of Technical Education | 2023-27

B.Tech in Computer Science and Engineering

TECHNICAL SKILLS:

Languages: Java, JavaScript (ES6+), TypeScript, Python, SQL, HTML5, CSS3

Frontend & Backend: React.js, Next.js, Redux, Tailwind CSS, Spring Boot, Node.js, Express.js, Microservices

Databases & Tools : PostgreSQL, MySQL, MongoDB, Docker, Git, GitHub, CI/CD Pipelines, Postman, Vercel

Core & AI: DSA(400+ Questions), System Design, Distributed Systems, Gen AI, LLMs, Prompt Engineering, RAG

CERTIFICATION:

Java Developer (Spring Boot + AI) – (Jan 2026)

Generative AI with LLM – Coursera (Aug 2025)

Prompt Engineering – Google (Aug 2025)

PROJECTS:

1. Hateable– AI Microservices Platform ([Github](#) Link)

Tech : Java, Spring Boot, Kafka, Redis, PostgreSQL, Docker, React, Kubernetes

- Built a **scalable microservices architecture** using Spring Boot with **REST APIs and JWT authentication**
- Implemented **event-driven architecture with Kafka** for asynchronous communication
- Used **Redis for caching and rate limiting** to improve performance
- Integrated **LLM-based AI code generation system** using prompt engineering
- Managed data with **PostgreSQL (JPA/Hibernate)** and **MinIO for storage**
- Deployed using **Docker**, ensuring **scalability and fault tolerance**

2. Currix – Resume Builder ([Live Demo](#) / [Github](#))

Tech : Spring Boot, MongoDB, React, JWT, OpenAI API

- Built an **AI-powered resume analysis platform** to evaluate resumes against job descriptions and improve ATS compatibility
- Developed **secure backend using Spring Boot and Spring Security with JWT authentication**
- Implemented **ATS scoring, plagiarism detection, and AI-based resume suggestions using OpenAI API**
- Designed and managed data using **MongoDB** for efficient resume storage and retrieval
- Integrated **Cloudinary for file and image storage**
- Built responsive frontend using **React and Vite for fast UI performance**

3. Kozen-chatbot ([Github](#) Link)

Tech : Node.js, Express, MongoDB, Gemini API

- Built **AI chatbot with Gemini API**
- Implemented **authentication and session management**
- Designed **responsive UI with theme support**
- Used **MongoDB for data storage**
